Dear Sirs

Application # 2017.0586.5  
Consultation # 2017.365

The Municipality of Louise Council wish to support the concept of The Weather Network remaining as custom local forecast to TV subscribers.

Accurate up to the minute weather forecasting is a very important source of information for rural residents who rely on such when planning their work and leisure activities. Safety for people is a paramount priority for the community and weather information forms part of this. Retention of access to this information on the basic tv package is an essential service for people who live in rural Manitoba.

Yours faithfully

Penny Burton  
Acting CAO  
Municipality of Louise
