RE: APPLICATION #2017-0586-5 and CONSULTATION #2017-365

At our most recent Council Meeting, November 6, 2017 a discussion was held about the value of THE WEATHER NETWORK to be available on the basic television service.

The service provided is crucial, we are a remote community in the Bay of Fundy and the main industry is Lobster Fishing. An up-to-date weather forecast is crucial to the safety for the fishermen that are leaving the wharf for a long day on the water, and a long way from the safety of home.

Council passed a unanimous Motion to support that the WEATHER NETWORK be available as a component of the basic television service.

Yours Truly,

Dennis GREENE
Mayor
